

MAYLAND TERRACE
CONDOMINIUMS

Save Some Water

For many years the City of Calgary has been conducting a toilet replacement program for residential homes that have a water meter. This program has now been expanded to include condominium sites, including Mayland Terrace. Below is an excerpt from our city's website.

"Toilets are responsible for nearly one-third of the water consumed in your building, costing you the most money to operate than any other fixture. The good news is you can stop flushing your money away by switching to low flush toilets and be eligible for a \$50 rebate from The City of Calgary."

"The City conducted a low flush pilot project last year with volunteer apartment and condominium buildings willing to make the switch to low flow toilets. The results show that the participant buildings are saving annually on average \$87 dollars per toilet per year. Aside from receiving a \$50 rebate per eligible low flush toilet, these buildings also benefited from lower water bills. On average, participant buildings saved 30 per cent off their annual water bill, making the payback period for new low flush toilets just over one year. With the toilets now paid for in full, all future savings are long term profits!"

If you would like more information about this program, please visit our website at <http://www.maylandterrace.com> There is a link on the main page of that site which will provide more information concerning toilet replacement. This is a great program if you are looking to change your bathroom fixtures or would like to be a little friendlier to the environment.
